

The power of information.

Spotlight on:

- Scoop PageTrack
- Scoop eLibrary
- Scoop ePaper

Scoop PageTrack gives you total control over your page production.

With *Scoop PageTrack* you will monitor and control pages during production.

The product supports both QuarkXPress and Adobe InDesign. PageTrack also becomes a shell, where you check out/in pages for editing.

Some of the features are:

- ✓ Work with different formats, editions and products for each issue,

Track your workflow with Scoop PageTrack

- ✓ Integrate PageTrack with your advertisement system,
- ✓ Get production overview with status symbols and page images and PDFs,
- ✓ Choose between Page view, Plate view, List view,
- ✓ PageTrack runs in a web browser, making it easy to share.

By clicking on a thumbnail page image, a picture appears in the left-hand margin with all information about that page. A click on a command button displays the current page contents with ads, articles and pictures.

Store & publish your paper Scoop eLibrary Scoop ePaper

Scoop eLibrary stores your articles, pictures and pages. All content is logically linked together.

And with *Scoop ePaper*, you create your digital newspaper.

Both *Scoop eLibrary* and *Scoop ePaper* work together with any editorial system.

Scoop eLibrary.

The products give you the opportunity to build or enhance your internal and public archive solutions – and to offer your readers a digital version of your newspaper or magazine.

Some of the features of eLibrary are:

- ✓ Search in full-text, captions, headlines, or combinations,

- ✓ From the search hit list, choose to see the full page in PDF, the article in PDF or text, or the pictures,

✓ The information structure is XML-based and can be integrated with other systems,

- ✓ Runs in a web browser and requires no plugins,

Features of ePaper:

- ✓ Fast presentation system by using page images and HTML,

✓ Select page and article, and choose to read the full page in PDF, or the single article in PDF or text,

- ✓ Manages and displays ads as well as editorial content,

- ✓ Runs in a web browser and requires no plugins.
